TRAINING LAB

Our LAB at Seamfix is equipped with high speed developer computers that can process computer programs in short time. Our aim is to build a proper learning environment and a culture of virtue for the attendants of the JUS course.

We not only desire to impart knowledge and skills required to solve industry problems, we seek to impart knowledge of human virtues and motives for hard work.

ABOUT SEAMFIX

Seamfix is an enterprise software solutions development and delivery organization.

We develop and deliver software solutions, offer specialized Information technology services, deliver Information technology solutions consulting to businesses and business brand improvement.

BRIEF HISTORY

Seamfix is run by a synergy of Nigerian professionals with experience in business management and modern enterprise software business practice. **Our people have supported the software revolution in Nigeria.** *We have worked on individual and collective basis on the automation of the Nigerian Universities, and National SIM card Registration exercise for leading telecommunication Operators.* Seamfix was incorporated in 2007 and has been on a rapid positive growth curve ever since.

SOFTWARE DELIVERY MODELS

Seamfix delivers enterprise software with two industry accepted models, **SAAS** (Software as a Service) model and the **ASP** (Application Service Provider) model, around her **Orbita™** Portal Platform, driven by open standards. Orbita™ provides the appropriate *technology landscape to host internet, intranet and groupware software as standalone solutions and services.*

Our **SAAS** model delivers **SchoolOnline™** for basic and secondary education process automation and **PrimeHRM™**, for human resource and payroll automation across industries. With our **ASP**, we deliver **Campus Manager™** to Universities, Colleges of Education, Polytechnics and other institutions of higher learning across Nigeria.

Electronic Governance is our passion. This passion is backed with a corporate strategy to deliver the best technologies for Government, powered by **Orbita™**. Our choice model for e-Government solutions is the **PPP** (Public Private Partnerships) where this is possible with Intercontinental bank as our finance partners. Our e-Government solutions provide the best business intelligence and warehousing platforms for decision support.

We practice Software Engineering with the highest level of industry discipline and ethics. Well equipped with mature methodologies and industry best practice. We enjoy software development and that is our core expertise.
